Weak, Thin, Nervous People Should Take Bitro-Phosphate

What It Is And How It Increases Weight, Strength and Nerve-Force

Judging from the countless preparations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms and back, and restoring vitality and energy, it is evident that there are thousands of men and women who are suffering from weakness and thinness.

Thinness and weakness are often due to a lack of the phosphorus element in the body. This element is contained in modern foods. Physicians claim that it is the most important element in the body and that it is the cause of many diseases.

By feeding the body directly and by supplying the body cells with the necessary phosphorus food element, Bitro-Phosphate will produce a welcome transformation in the appearance, the increase in weight, strength and nerve-force.

Increase in weight also carries with it a general improvement in the health. Nervousness, sleeplessness, lack of energy, which nearly always accompany excessive thinness, should soon disappear, dull eyes brighten and hair should grow extra fast.

CUTION. While Bitro-Phosphate is advertised for the relief of nervousness, general debility, etc., those taking it who do not desire to put on flesh should use extra care to avoid fat-producing foods.—Adv.
